Rustic, stripped down folk. 12 MP3 Songs FOLK: Modern Folk, FOLK: Alternative Folk Show all album songs: Clear Blue Loving Sky Songs Details: There are conflicting reports regarding the enigma that is Caleb and Friends. Most reports suggest that front man, Caleb Minium, started the band when charged by God himself with the responsibility to create the most beautiful music humanly conceivable. Others suggest the divinely euphonious sounds are a result of Minium's travels as a satanic missionary through the coffee fields of Zimbabwe. Minium speaks very little of his extensive travels and personal life. It is known that Minium has suffered from fetus in fetu in his early twenties. When first confronted with the affliction, Minium had mixed feelings about removing his parasitic twin. Once doctors explained that the twin had to be removed for he himself to live, Minium acquiesced and underwent the separation procedure. Minium still feels a powerful void where his parasitic twin once lived that is clearly evident in his sorrowful, melancholic melodies. Friends of Minium have reported that as a child, Minium was often locked in a room by his parents and forced to watch The Sound of Music for days on end. This probably accounts for his often referring to himself as an honorary Von Trapp Family Singer. Minium has also claimed that the late Rev. Jerry Falwell is his illegitimate grandfather. This has never been substantiated. Minium has worked in many bands in the past including, Lobotomy, The High Point Ramblers, The Wilson Electric, and The Von Taint Family Singers. Clear Blue Loving Sky is possibly Minium's magnum opus. But it may also be his swan song; having prophesied his own death sometime in the Summer of 2007. Enjoy.
