Multi-layered electronic soundscapes. 11 MP3 Songs ELECTRONIC: Soundscapes, ELECTRONIC: Ambient Details: "A composer with strong, imaginative ideas... music with genuine powers of description." - Tom Manoff, NPR Reviewer Classically trained musician Jeffrey Radcliffe paints his visions electronically in his first CD, Travelog. Travelog's 11 tracks encapsulate Jeffrey's musical explorations over the past few years. From the sinister and sinuous Et Tu to the soaring Dream Flight of Atalanta, from the unbridled exuberance of Transalpine to the sparse and airy Landscape, Travelog charts a journey through fantastic, unknown places. What People Are Saying About Travelog: "This CD is truly a compendium of wondrous locations, wayfaring between border defining realms of IDM and ambient to nouveau classical and soundtrack. Clear chimes between plucked glass and tapped piano with lush, sweeping strings over synthetic drums and rasps create places individually unique yet collectively shared. Listening with headphones is rewarded: this is music to write to." - Vlad Spears (2secondfuse.com)
