Delusion was formed in September of 1995 by Phil Carnes , who embarked on a journey to recruit a handful of great musicians to record an album of rock and metal songs he had written. In October of 1995 , after comprehensive trademark searches , Delusion was born and the official website was launched on the internet. With a few demo samples on the website the band thus began what would become a modest worldwide fanbase. Delusion has strangely become an almost cult-like sensation leading to overwhelming internet support , a record contract , distribution , endorsements , songs on the internet charts , and much more ..... Delusion credits a great deal of its exposure to its inclusion on The Iron Maiden Tribute album released on Energi/Adrenaline Records in Italy and the annual Powermad Festival that was held in Maryland from 1997-2001. Delusion's new eleven song album , The Tragedy of Regrets , and their first music video were completed in 2003. The album was mixed and mastered by Drew Mazurek , whose credits include Gwar , Nothingface , Linkin' Park , Dog Fashion Disco , Souls at Zero , etc. Delusion
