Details: The Story behind Favorite Shape Triangle: Aaron met Darren in a Radiohead-centered AOL chat-room on the 4th of July in 1997. 3 days prior OK Computer had been released and the two were discussing it. It's been recalled that Weezers Pinkerton, released that previous Autumn, was also a topic discussed with mutual enthusiasm. As Aaron Darren quickly discovered they shared similar sonic preferences, Darren informed Aaron that he himself was in a band (Phantom Planet), and that Radiohead and Weezer had been major influences at his band's inception. Aaron Darren shared also in the middle name Michael, and their respective gals shared the middle name Ann. It was all too much to dismiss, and the two became fast friends, if for nothing else but middle names. Now, a decade later, while the middle-name-Ann's may have gone by the wayside, Aaron Darrens friendship has not. Aaron gradually taught himself a little about music, though cinema had been his traditional realm of study. He also learned to read books and to write lyrics. Darren has been consistently devoted to the Phantom Planet cause, progressing as a guitarist with each passing moment -- he lent his masterful guitar-work to Favorite Shape Triangles debut (self-titled) release. Also worthy of note: for six of the ten years passed, Aaron found himself beautifully entrenched in a relationship with one, Caroline Lyders. She and Aaron split in 2007, but not before she lent her vocal talents to "Change" and "Smackers," two tracks found on Favorite Shape Triangles debut album.
