Catchy Pop Rock tunes w. intriguing lyrics 6 MP3 Songs POP: 80's Pop, ROCK: Classic Rock Details: I was first introduced to music through my family record player, and my songs reflect this. My favourite songs growing up were - The Theme from the Magnificent Seven, Peter and the Wolf, The William Tell Overture and Whispering Chimes by the Drells ? Then my sister discovered Rock and Roll and it was all over with. I played violin in school orchestras until I bought a guitar. My first bands played on the U.S.Bases in Germany, in clubs in England, then California Clubs. I toured with a "fake" version of the Association, doing Along comes Mary and Never my Love. I wrote this CD in a fun style - It is not supposed to be comedy. It is supposed to be interesting. If you find it funny, great ! I just hope you like the songs.
