Modern Alternative Rock with a sizzling shot of Texas Blues. 12 MP3 Songs BLUES: Texas Style, ROCK: Modern Rock Details: Alternative. Ambiguous term, isn't it? Alternative to what? What do you call a band with the melodic sense of Matchbox Twenty, Train, or Ian Moore and a searing lead guitar reminiscent of Hendrix or Stevie Ray Vaughan? Alternative? Blues? Or just Rock? Whatever you call them, the men of Soulville deliver. On their debut release, their sense of melody shines through and grabs your attention - only to have a sweeping lead guitar come in and take your breath away. And should you pay attention to the lyrics (I recommend you do), you won't find messages of depression or discontent; rather, the message is upbeat, with a "lessons learned" slant that is familiar to everyone. Recorded and mixed by Eric Delegard (Bowling For Soup, Cross Canadian Ragweed) and produced by the band, Soulville takes the listener on journey that begins with "Shine On" and its message of moving forward in life, and concludes with "Redemption", a song whose powerful message of personal accountability leaves the listener with a sense of renewal. Whatever your musical taste, this band from Ft. Worth, Texas has something you can identify with. And this, their first release, shows a strength that makes the prospect of future releases a highly anticipated event. "Surprisingly crisp and clean production for a DIY release....Soulville's debut is cause for genuine excitement!" - Fort Worth Weekly "Soulville crosses Matchbox 20 with Led Zeppelin, Train with Stevie Ray Vaughan. Recorded/mixed by Bowling For Soup engineer Eric Delegard, the production has the clarity of anything on K-Rock." - Music-Tech.net
