Easy Listening - Background Music 12 MP3 Songs EASY LISTENING: Background Music, EASY LISTENING: Love Songs Details: Dreams of the Heart is a collection of 12 orchestrated original melodies. The album used a total of 19 musicians and 14 different instruments which gives each song its own feel and identity. This means that the listener wont get fatigued or bored because each song is arranged and sounds different from the next. Some of the songs have interesting instrumental combinations. For example, one song has a Harp and Guitar interweaving a melodic and rhythmic background to the main theme. This music is rare because you can play it softly as background music or listen intently and hear numerous instruments melodically interweave behind the melody line. All of the songs on this album were originally written for a person based upon their personal vibration which I have musically interpreted. This album won the first prize in the Tempe, Arizona art fair in 1994 and has been played on some easy listening radio stations.
