An urban Folk, Jazz, Funk and R&B cocktail. 10 MP3 Songs  
BLUES: Funky Blues, JAZZ: Jazz Vocals  
Details: This CD is called Live. There is no audience however, no whistling cappuccino machine, no overzealous maniacs applauding like they want to find themselves on your record! No no, what is Live about this CD is the performance. This CD was recorded LIVE to Two Track (I was going to call it that, but the non-musicians kept giving me puzzled looks). What that means is we really were playing together, by the way not under headphones in separate rooms either. If we recorded in separate rooms, or with separate mixes we could have corrected anybody's track if they heard a mistake. No thank you very much, we went for the recording experience probably somewhat like recording records was done some thirty or so years ago. The studio we found was designed for this kind of retro - recording experience and this experience only. There are magical moments for me as a result that sound exactly like what it sounds like to from the stage at either of our steady gigs at the 55 Bar in NYC West Village (55 Christopher St NYC- 212 929 9883) or at Danny Cafe in Ossining NY.
