Noolmusic- 8 Years of Electronic Music in the Bag 13 MP3 Songs ELECTRONIC: Drum 'n Bass/Jungle, ELECTRONIC: Trip Hop Details: I haven't had life too rough, it has allowed me to remain open minded (more or less). I had been composing music using various trackers from 1997-2000. I remember searching for jungle on my text only search engine back in the wonderous years of Win95 and bumped into Impulse Tracker. I tried others but they didn't cut it ... in 1999 i discovered Buzz and have been using it since. Six years using one program is a good amount of time to figure out quite a bit about it. Buzz is vast enough that it allows for several degrees of learning but it is fast, so my attention deficit disorder gets placated.
