

Mp3 Steve Sutherland - West Of Sunset

[DOWNLOAD HERE](#)

Country-influenced cross-over music fusing alternative country with a breezy West-Coast freedom; memorable, timeless songs to charm you. 13 MP3 Songs COUNTRY: Country Rock, COUNTRY: Country Pop Details: I'm a tall blue-eyed, Scottish singer-songwriter, now living in London, England. A long-term fan of Country and Rock'n'Roll, I have sung lead vocals in a number of bands, most recently "Western Star," doing classic covers and originals in bar-room gigs in and around London. I've gone on to develop my own personal style and song-writing techniques into an artistically credible product, as presented here on my new CD, "West of Sunset". So what makes me, Steve Sutherland, different from all those other singer-songwriters out there? It's hard to say, but easy to hear. So listen to the individualistic vocals and uplifting guitar solos weaving between a melodic alternative country sound and a breezy West-Coast freedom, and feel the wind in your hair as you cruise down the freeway..... "Every note, every whispered touch an occasion to be savoured, cruising timelessly through a metropolis of street, block and avenue Complemented by sleek Benz and the international flavour of continental Americana Be brave, follow your senses Add what you will, take nothing away In the deep dark haze a glimpse of that provocative style offering the suggestion of endless pleasure then reeling back in the afterglow content for a moment before heading off into the wide open spaces in the never ending search for the soul of fulfilment Another song ends, dreams and reality come to rest"
