

Banner Gate

[DOWNLOAD HERE](#)

Banner Gate A completely new concept in marketing your password site. Allow users to signup and send you unique clicks for free access to your password site. Instant account activation, secure code blocks uses of image tag and frame triggers. Tracks both with cookies and IP addresses to prevent cheating. Members can check their stats in realtime. Admin interface allows easy overview of accounts and deletion of dead accounts. Once user has surpassed your predefined threshold an email is sent out to the administrator notifying that a free account has been earned. We put this system on our site and watched our traffic soar by 35 in the first 3 days. System Requirements Perl 5 Mysql Database Software Msq-Mysql Module DBI Module Password protection ability recommended Unix recommended Sendmail Features Mysql backend million times faster than lame flatfile systems Allows account holders to login to check their stats in realtime Tracks impressions, clickthroughs and CTR's Secure admin interface allows overview of all account statistics Admin statistics calculated Modify & Delete accounts at will Uses both cookies and IP addresses for maximum security Negligable system load
