Details: 2 HUMANS THE COSMOS Is a performance assembling a cello and a laptop. Classical music and melodic harmonies of the cords meet the electronic beat and sound. The duo, Michael Kott and Luca (lucalyptus.com) explores the fields of harmonies, as well as sonic, profound and cool landscapes, formerly strange somehow speedy with alien discussions. This is the soundtrack of an imaginary film. It's like the sound of the morning light. The idea of this project was born in spring 2003, while Luca was playing a series of concerts in New Mexico with a San Franciscan poet; Michael and his cello took part of the group and altogether improvised their music. The result was so interesting that Luca Michael decided to continue the adventure with an album. The album was recorded in November 2003 in Switzerland. Then the material was remixed in Milan in 2004, mixed at the Rising Sun Studio in Bruxelles (Arno) with Marc Lacroix (Da Puta Madre, Lucy Lee records) and Thomas Stiehler in Berlin (Klaus Schulze, Killing Joke, Jeff Mills) made the mastering in May 2005. The band performs since 2003 in major clubs in New Mexico, Philadelphia and Switzerland.
