KIDS/FAMILY: General Children's Music, KIDS/FAMILY: Kid Friendly Details: This is another album I wrote for and about my music pupils. They will tell you anything you want to know and add a fib or two just to please you. It has always pleased me to hear their imagination run on and on. They told me when they had to sit in the corner and why. It was always gonna be bad when daddy got home. I knew all they did the day they had to stay home from school because of snow as well as how they missed school?? ?? When they went to a western movie they would come home and cast the parts from their friends and perform the show over and over until they saw a new movie. Of course the smallest child had to be the outlaw ... tied up, hung, shot or whatever. The WHAT IF game was a lot of fun as well as the game with names. What if dogs meowed and cats bow wowed? If cows should coo and doves should moo? The world would be going crazy. Right? Did you know animals can sing? Well, they can and they do. Hear them on ANIMALS CAN SING. Have you ever been to a family reunion and watched the adults hug and kiss and slurp all over kids.. Then muss their hair? Well, kids don't like that. I didn't even like it when I was a kid. In this album you'll find a lot of other fun songs. Did you ever wonder what happens to a mail box during all the seasons of the year? It's hardly ever comfortable. They endure all of the scorching heat, rain, storms, snow and icicles hanging from their gut. It's terrible.. They are helpless. If you want to hear all the sounds of a baseball game you can find it here. You'll love the sound effects and it has a surprise ending ... Poor little skunk. Nobody loves him. His best friend said he stunk. He wants to find a mate of his own but just one sniff or a whiff and his lovers yell pew..... HOW COME YOU'RE A BUM is a fun song but it also teaches children how sad it is for a human being to waste his life. If you have never been

to a Pizza Store birthday party for a child you can experience it first hand when you hear BIRTHDAY PARTY. You'll hear all the noise, confusion and problems. A lot of neat sound effects. Try this album. It's different. You'll like it. Frances V. Long Jacilyn Music
