It was entitled "Lucid" for the week(s) of lucidity during the writing, recording and performing of this material. The moments before, during and after the recording were some of the happiest of the bands existence and very real emotion can be heard on these tracks. This cd has a very modern rock sound with some throw back sounds of the classic rock days. Frank Hart did a masterful job of getting out of the band what you hear on this recording! Ock Roll!
