Melodic new age solo piano. Easy listening, ambient, relaxing music. The cd came out so sweet, I decided to share it with you. These harmonic bell-tones give a beacon of light and hope to all that listen. Enjoy my Sweet Mizery, and my style of melody. 10 MP3 Songs NEW AGE: Ambient, CLASSICAL: New Age Details: Born in 1964, in a country of the beautiful Mediterranean Sea. Night after night, war ignited the land that no one thought of ever leaving. At age 16, traveling out of his hometown was not his idea of change, but it was his destiny. Seeking a new life and a future, he found himself in a country that finally became a second home. The country of opportunity, and the country of the free. Fulfilling a life without his family was a big sacrifice, but it had to be done. He put himself through college, and finally graduated in 1987 with a degree in science. Still feeling incomplete, he worked for Corporate America, job after job, putting his music aside. He got by and lived a very decent life. The desire to be with his family, kept him feeling empty. And that feeling of emptiness made him realize that this is the point in his life, that he misses his childhood dream, which is music. The love of music, and the desire of creating it. For every hardship he came across, in his day to day life, he wrote a melody to ease his pain. Finally, procrastination took him to 2006, where he put together 10 sweet melodies on a cd. Was it a dream, or his destiny? He is leaving a life of misery to complete his style of melody. His first Album "MIZERY BY RAMZI" is a melodic solo piano that will bring out the best in you, as it did to him. He operates with an ambient imagination, faith, and hard work. Seeking a life in music, and finally going forth in a solitary and distinctive path. You will hear a lot more of his music in the upcoming years. "My life was granted with permission, because music is my mission". See you on "THE OTHER SIDE OF MIZERY".
