

Mp3 Valiumspeed - Magenta Drive

[DOWNLOAD HERE](#)

folky- popy - rocky - moody - catchy. songs about love and how to live if life is not necessarily that perfect you wish.hm.....or something like that 16 MP3 Songs POP: Folky Pop, ROCK: Folk Rock Details: valiumspeed - the story melancholy pop songs, in the tradition of singer/songwriters such as jeff buckley, nick drake or elliott smith, that's the essence of the formation valiumspeed, built around singer and band leader dani stoller. he is on an eternal search for the perfect pop song (but secretly hopes never to find it ...).it must be short and intuitive, coming directly from and for the soul. Then bring the red wine and a burning candle. Time for the feast ... dani formed valiumspeed in 1998 with musicians from RagMamaRag and the guitarrist/singer k-cee from the companion band mas a tierra, and then they produced the debt-cd this shit hits. A mix of electronic rhythms and warm guitar - as if massive attack were playing nick drake songs. on the follow up swiss tour, the band opened for amongst others, the go-betweens. in 1999 the music had matured, the electronics and half of the band were sacked. In the same year the ep songs for lovers was recorded. a soft acoustic pop album in the classical singer/songwriter style. in autumn 2000 stoller, k-cee and bass player daniel alexander - along with stoller, the last member from the RagMamaRag time - brought the guitarist mathias bieri, from the fribourg postrock band bela and the drummer bald b. (mas a tierra) into the band. with this lineup a number of gigs were played, new songs were crafted and this led to the creation of the current valiumspeed sound. a lot of guitar and beautiful harmonies, complete with a hip swing inducing rhythm down below. in summer 2002 the album ain't love grand was recorded. a gorgeous piece piece of music between melancholy and and romantic. love, again and again love. thats what keeps the world alive. that's also the message of the single perfectly you and also of the videoclip for the song. in november 2003 stoller was able to fulfill a long open wish, to record a purely acoustic album. digitalfolk is the name

of this mini-album and guarantees shivers of pleasure for the listener, with the assistance of vreni stadelmanns magical guest vocals. the cd is exclusively available at valiumspeed.com. reto burrell has covered the vs song spell on me on his acoustic album roses fade blue and has pushed the song onto many european radio playlists. april 2004: a lot of enthusiastically recieved concerts have been played, an extremely fruitful studio visit announces the next album, titled evergreen ballroom it comes over as even more playful, more multi-dimensional and hypnotic. completely wrong is the name of the single and its more than completely right! hard to believe, but valiumspeed have so to say quadratically trumped themselves. the songs are of a piece, they have won in urgency, the band plays perfectly but like a sleep walker, and if that doesn't sound like too much of a good thing, there are already a host of new song pearls already in the live set, and one or the other of these will be tested during the coming gigs! in concert dani stollers voice, which can really get under your skin, stands in the middle point, flanked by multiple backing vocals, three guitars, flowing bass lines, hypnotic drums and just now and again thunderous noise. if the drugs don't work ... and now the new album is in store : MAGENTA DRIVE
