Debut album from Severe Illusion-sideproject. With slightly distorted vocals and arhythmic bass lines Vanvrd are the missing link between hard electronics and even harder electronics. CD limited to 500 copies. 12 MP3 Songs ELECTRONIC: Industrial, ELECTRONIC: Experimental Details: Non danceable EBM act Vanvrd was formed on Visings, Sweden in the summer of 2004 by Fredrik Djurfeldt and Ulf Lundblad. Living inside the electro scene for well over a decade and a half both members felt the scene had evolved in a far too logical direction. Order must be replaced by disorder, noise by some other stuff and production should be abolished. After working together on several projects such as Severe Illusion and Instans they felt it was time for yet another project, and after several weeks of hard work a small but critical step was taken in the evolution of the band. Music had been recorded. From this moment they knew there was no turning back. The first album from Vanvrd, bravely entitled Liv i världens slutskede, is limited to 500 copies and features 12 tracks of electro-industrial minimalism.
