A unique fusion of Jazz, Funk, Rock, Ambient, Electronica and Film Music incorporating everything from killer acid grooves to mind expanding soundscapes. 11 MP3 Songs JAZZ: Jazz Fusion, ELECTRONIC: Soundscapes Details: 'Visible Breath' has achieved no less than seven Internet No.1 chart positions with five separate tracks from the debut CD "Fuse". A strange and mercifully short biog' now follows: Having spent several years helping to form (and disband) various 'local' multi personnel artistic collectives ('bands' to you), Dun Strummin decided the only way he was likely to achieve the sounds he was striving for was to go it alone. Unfortunately, the logistics of attempting to be in control of 5 or 6 different instruments at the same time during a 'live' gig proved a little too challenging. Luckily, he had heard talk of a new fangled media called 'The Internet' and decided to take a look. Precisely 3.7 seconds later he was hooked! From then on he decided to let the digital revolution do the donkey work. So now he can write the odd ditty, push a few buttons and Bob's your Auntie! (he had inherited a somewhat eccentric lineage). Of all the places Dun could be right now, like snowboarding on Pluto or topping up his tan on Venus, he had to admit that Earth was just about the funkiest planet in the Solar System!
