Swedish power pop 19 MP3 Songs POP: Swedish Pop/Rock, POP: Power Pop Show all album songs: Favorita Songs Details: Twelve years after it was recorded and never released, Popsicle Recordings is proud to present the sole album from Swedish indiepop pioneers Favorita. The brainchild of former Beagle and current Metro Jets frontman Magnus Borjeson, Favoritas self-titled album is an explosion of noise and colour that happened twelve years ago, like a supernova in a far-off galaxy that no-one ever saw. Favorita were poised on the brink of success with two killer singles released, a brilliant album in the can and a Scandinavian tour with Pulp under their belts. Then their indie label was dropped by its mother company and it imploded, taking Favoritas future with it. The band split up and the album was forgotten....until now... With Magnus latest band Metro Jets churning out pop classics like The Morning Show and an ongoing interest in his seminal early 90s powerpop band Beagle, we here at popsiclerecordingsdecided it was time put the missing piece back in the puzzle and give Favorita the international release it deserves. So weve dusted off the master tapes, added eight bonus cuts and both of the bands low-budget videos, unearthed photos from the two promo shoots the band did and coaxed some inspired sleeve notes from noted Swedish journalist and blogger (and former Beagle drummer) Anders Mildner. The result is the definitive Favorita experience. Everything you could want to know about this exceptional but criminally short-lived band, there on one disc.
