Old School Death Metal with Grinding Guitars and blasting drums. 10 MP3 Songs METAL: Death Metal, METAL: Thrash/Speed Metal Details: Goat Bleeder was started by experimenting with different guitar and drum sounds until I found a distinct style that I liked. This CD I feel is one of the best I have made in the last year. The guitar sounds are audible and clear but don't lack in the brutality. This project is a one man effort with me performing guitar, bass, and vocals. I write all my own music and do use a drum machine to enhance the effect.
