Young, free-wheeling attitude coupled with lyrical substance, make Blueprint a scrapbook of your college days. Drawing upon influences like Sheryl Crow and Tom Petty, Shevy's tunes take you back in time and make you smile at the crazy little journey call 10 MP3 Songs COUNTRY: Country Rock, ROCK: Roots Rock Details: WHO Shevy Smith WHEN I arrived on the 16th day of February in 1983. WHERE I grew up on a small farm in central Kansas. It was the type of place where boys still drive souped-up muscle cars, and Saturday nights consist of parties around a bonfire. WHAT At the age of four, I began playing the piano and picked up guitar when I was thirteen. I write on both instruments -- and on airplanes, road trips, and Taco Bell napkins WHY The need to connect with others is definitely the motivation behind why I play. Call me idealistic, but I truly believe that music is the catalyst for happiness and understanding in most of our lives. It helps us sort through our thoughts. If I can offer that sense of clarity to a listener through a song, then I feel somewhat worthwhile and useful. HOW Most of my songs are very much based upon first hand experience. I find it sort of difficult to write an impersonal song that evokes any kind of emotion. I am completely enamored by imagery, so I tend to spend a lot of time trying to paint an accurate landscape, or picture, for the listener. The story line in a song is much like a little movie to me. If I am writing about a boy in a beat-up four-wheel drive, I could also tell you what color his eyes are, if he burns or tans in the sun , and that he won the jump-roping competition in the third grade. Fleshing out characters that are only just a shade away from being real is the basis for an interesting story and helps lead a song in to honest territory.
