The music on this Cd is instrumental with a lot of guitar, keyboard/synthesizer work, use of twelve string electric bass and one use of a drum machine. There are no vocals except on three tracks where I count down the timing as a introduction. Each trac 10 MP3 Songs ELECTRONIC: Soundscapes, JAZZ: Free Jazz Details: The .....ODYSSEY is the third realease by THE EXPLORATION PROJECT. The ...ODYSSEY represents all events in life, both individually, nationally, and globally. Additionally, it spans time; from the ancients to the unknown futures we all face. It is truly a musical epoch. It is best not to give out too much information about this cd, it is far better for you to purchase it and see what it is about for your self. Every aspect of this Cd is intentionally set. Musical events within the Cd as well as the cover art or lack of cover art are designed to link with the total concept presented. Every track is different in style and genre. You should only listen to this music when you have the time to give it your full attention. This is not conversational background music! I should point out that the only vocals on the cd are when I count out the time for Larry on the beginning of three tracks. I thought it sounded better with this countdown left in. This CD is in to process of being reregistered and reissued with nicer cover art work. The new cd will be intitled THE INFINITE ODYSSEY and should be up and running in a couple of weeks on cdbaby. Additionally, the first few copies of new cd have been signed by me- Scott M. Rifkin. Eventually, the older cd,Odyssey will be phased out! Thanks for understanding Scott M. Rifkin 2/13/05
