Atmospheric, electronic, piano-synth, Absynt. Melodic according to the running of the programs. With operatic voice by zackota. 13 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Soundscapes Details: This is the first CD! In the middle of university study and with the first computer and a friend which turned out to be able to handle this thing,(I would have thrown it out of the window straight away). I was with joy very experimental on the piano keyboards, music programs and certain piano rolls and struck lucky. I could wright melodies fast and easy, but not repair the computer. Where the other half could repair the computer or carry it to the repair shop, but then not write music, ha ha!!!
