Discover "Hidden Investment Strategies" that Creates Warren Buffet and Other Millionaire Investors Rich. Get Access On How You Can Grab This Insider Info to Start Build Your Portfolio wildly. The Insiders Information that Offers Huge Dividends, Massive Growth Potential, Tax Breaks, Limited Downside Potential & More... From: Dee Ferdinand, Alex Albert & Rene Fong Dear Internet Friends & Aspiring Investor, If you're getting a little fed up of an average performing portfolio then what you're going to learn today will leave you feeling speechless. Right now, there are certain investment opportunities in specific markets that are spewing out incredible capital returns, gigantic dividends and more for investors. You're going to discover exactly what these investments are, and how they could make you stellar portfolio gains over the next one to five years. These Seven Red Hot Investments Have Been Hand Picked Out Of Hundreds Of Choices Because They Offer Staggering Potential For Growth, BIG Dividend Payouts, Tax Breaks & More! First a quick note on investment psychology - how do you pick your investments? Do you read the popular financial press? Take advice from your broker? Let me tell you something about the investments that go on to make 100, 500, even 1000 and more... The best investment opportunities are

those that are currently HATED but hopelessly UNDERVALUED! Cheap assets that are just on the verge of a massive uptrend - find this type of investment and you'll discover the type of investment returns that you thought was reserved for the elite few only. A lot of the investments we'll discuss in this package focus on exactly this type of investment. Let's go on to see exactly what you're going to discover inside the Red Hot Investments package... Red Hot Investment Unleashed Strategy #1 Japanese Real Estate

Could this be the most potent investment over the next decade and beyond? Read on and you'll discover why investing in a very specific type of Japanese Real Estate could be the star performer in your portfolio over the next 15 years. Some bear markets are unforgiving - long term wealth destroying trends that become hated and so untouched that their prices become ridiculously undervalued. And when you find an investment like this that seems to have gone as low as it can possibly get - you need to jump on the resulting revival. That's exactly the situation we're seeing right now with Japanese Real Estate. It started in the early 1990's when Japan tried hiking interest rates too high, too fast - the property market dislikes rate hikes...in fact it hates it with a passion. The result? Sixteen years of continual falls in the real estate market. It SLUMPED in a big way despite the government trying every possible trick in the book to get this viscous trend to stop. Nothing worked. For sixteen years. Now, Japanese real estate has for the first time displayed signs that it could be starting an exciting boom phase - one that could last for the better part of a decade and reward those who invest now with the same spectacular gains that we saw from some global real estate markets through the 90's and early 2000's. But you really need to know how and where to invest - and that's where The Red Hot Investments For 2007 & Beyond package comes in. Here are just a few things that you'll discover inside: The biggest problems that non-Japanese investors face when investing in Japanese real estate - you must be aware of these important threats or what should be the investment opportunity for the next decade could well become a crippling mistake. Plus the simple way of side-stepping these issues. Put your money in this - The best & safest way of grabbing the gains that could be coming in Japanese real estate. It's a little known way of securing the best properties that are set to explode in value (without doing ANY research at all on Japanese real estate). The Japanese real estate investment that pays out 90 of it's profits to investors by way of dividends! Do you know any other investment that generates cash and pays most of it out to stockholders? This is one stunning yet simple technique to exploit the coming Japanese real estate boom. Why Japan could be the biggest winner in the real estate market over the next decade and beyond (and why you're getting in at the very

start of a long uptrend). A listing of some companies & funds that specialize in Japanese real estate - finding reliable companies that have a huge exposure to Japanese real estate can be a troublesome task. We've compiled them into a table for you. If you believe in the philosophy of buying into cheap and hated investments \*just\* as they begin their uptrend then this is a potential investment that will have your head spinning. Imagine if you had invested in real estate in UK ten to fifteen years ago - you would have created an incredible amount of wealth. In UK, the real estate boom has subsided (as it has done in US) - in Japan, they're at the same stage now that UK was back then. Wouldn't you like to discover how to invest now? More insider details are inside the Red Hot Investments package! Red Hot Investment Unleashed Strategy #2 Tax Lien Certificates Most people just cannot believe that there exists a government backed investment that can generate very high yields on investment (between 8 and 50 per year) - and a maximum upside that can have you owning real estate at under a tenth of its market value. "Research shows that over 98 of tax lien certificate holders receive payments to the value of their investment within two years and if they do not, the tax lien certificate holder can end up owning the property for little more than the amount that was paid for the certificate" I'm here to tell you that such an investment does exist and despite being featured in Robert Kiyosaki's famous Rich Dad Poor Dad books, very few people know about the true power of tax lien investments - and fewer still are enjoying the incredible benefits they can bring. The Red Hot Investments package blows the lid once and for all on Tax Liens. You'll discover: Exactly how tax liens operate - why the US government gives you the opportunity to enjoy incredible yields and real estate ownership (at pennies on the dollar of the value of the property). Why some experts believe that tax liens are the biggest secret within the investment world. The important considerations to take into account before investing in Tax Liens. Why tax liens are ideal investments for those looking for high government backed yields with the possibility of owning real estate for pennies on the dollar. Tax liens are currently being held in the portfolios of some of the most successful investors in the world. However, contrary to myth you don't have to have a huge amount of capital to get started with tax lien investments (a few hundred dollars is enough to start). Red Hot Investment Unleashed Strategy #3 Land Investment Land is a natural resource that is undergoing a crippling shortage in certain key global hotspots. The availability of land in these places has been so scarce that over the past two decades that land investment has outperformed both the real estate and stock market (by over three times) - purely because of the supply/demand imbalance. The thing is, it's going to get \*much, much worse\* in certain

global hotspots where the lack of land could drive up land prices by unprecedented levels. Here's what you'll learn inside the Land segment of Red Hot Investments: Which country is currently experiencing a crippling land & housing shortage - so much so that the government has had to pump in billions of dollars in a long term project to help ease the problem. Why land investment is potentially a far easier & less involved investment than real estate (yet the capital gains for investing in the right land can be much bigger). How to invest in land for a far lower capital outlay than you might expect. BE AWARE - what you must be wary of before investing in land (how to identify & avoid the con artists who will try to sell you land that is of little value as an investment). Limited Time Bonus!! - We'll give you the complete Land Investment Profits eBook that ordinarily sells at \$27 on other sites for FREE . It covers how to invest in land for profits plus where and how to identify land that is about to explode in value. Red Hot Investment Unleashed Strategy #4 Commodities Investment We're seeing the start of a long term uptrend in global commodities - the reason for the boom is simple... "Supply VS demand basics - after decades of underperformance the amount of investment that had gone into the production of global commodities was woeful. A lack of money has gone into the production/mining of various commodities - now the demand has increased significantly and the supply just isn't there...and it can't be put into place to meet demand in the short term!" What drives the markets in it's most basic way? The answer is supply and demand. When supply reduces significantly there tends to be a rise in price. The same thing happens when demand increases. When you have a combination of reduced supply and increased demand \*together\*, the resulting price rises can be EXPLOSIVE. That's exactly the situation we have right now with global commodities. You may not have heard much about commodities (when was the last time you went to a dinner party and had a discussion about your coffee futures with the guests?). But the prices of many commodities are rising sharply and may well continue to do so. In the commodities section of Red Hot Investments you'll discover: Exactly why commodities could be the most stunning investments over the next five years - how commodities are at the bottom of their trend graph since the 1920's (adjusted for inflation), and why this combined with the huge supply/demand imbalance means that commodities offer sensational upside with highly limited downside. The global phenomenon that's happening right now that means the demand for certain commodities are going to go through the roof over the next few years (it's already started and we're only at the very beginning). This means that the supply/demand for certain commodities will be so imbalanced that their prices could well go through the roof (the supply cannot be

increased for many years). Why a mixture of reducing investment & poor output levels have meant that the supply of certain commodities are at an all time low (and reducing still). The top commodities to invest in - discover four sensational commodity investments that should be the top pick in every commodities portfolio. Commodities have performed terribly but are now poised to engage in one of the biggest bull runs in their recent history. You just cannot ignore the basic (and growing) supply vs demand imbalance and this makes commodities investment one of our top seven investment picks. With this guide you'll discover exactly what commodities to invest in & how to do so.

**Red Hot Investment Unleashed Strategy #5 Master Limited Partnerships** Master Limited Partnerships (MLPs) are practically undiscovered gems that offer good growth prospects, mouth-watering dividends and attractive tax breaks. Within this segment of the Red Hot Investments package you'll discover: What MLPs are and why they offer a bounty of big dividends, tax breaks and excellent upside potential. Where MLPs are traded and how you can invest. Why MLP's could EXPLODE once they are discovered by the major funds. A change in legislation that means a huge amount of investment is about to flow into MLP's (and why you need to act now to enjoy the potentially explosive gains to be made). MLP's are rarely mentioned in the press and unheard of by many (even experienced) investors. The Red Hot Investments package blows the lid on this exciting opportunity that is currently being enjoyed by the elite, sophisticated investors.

**Red Hot Investment Unleashed Strategy #6 Gold Investment** Many financial gurus believe that we're at the very start of a long gold boom. When you analyze their reasoning you can clearly see why. Right now the U.S. government is desperately trying to fight deflation and it has categorically stated that it will look to prevent this at any cost. The long and short of this is that more paper money becomes available while the amount of gold stays constant. Can you think what this means? The same amount of gold costs more paper dollars (or money) to buy. So as the amount of money being printed goes up so gold prices strengthen. It's expected that a significant amount of money will be printed over the next few years, and you don't need me to tell you what that means for where gold prices are headed. There are even more reasons why the current gold run could well be the start of a huge bull run. Traditionally, gold has always performed strongly during times of uncertainty. As the long running war on terrorism sees no end in sight the amount of paper money needed to pay for conflicts/wars etc rises. This huge increase in paper money will only continue to peg up the gold prices. Here's what's inside the explosive Part 6 of Red Hot Investments: The powerful economic & global events that could drive up gold prices to unseen highs. How the past history

of gold prices gives us a big clue as to the coming gold boom. How you can own gold NOW - various different ways of owning gold including stocks/funds, gold bars & coins & alternative strategies to exposing your portfolio to gold. Finally, we have one more dynamic investment for you to learn about: Red Hot Investment Unleashed Strategy #7 Selected Global Investment Real Estate Hotspots You may be forgiven for believing that real estate is no longer an attractive investment proposition. In many countries such as the U.K and U.S the risk vs reward equation is tilted too heavily toward the former. However, there remain some global hotspots around the world that are expected to enjoy staggering real estate appreciation due to a mixture of economic & political circumstances. In many of these places investors could well enjoy 40+ capital growth and good yields with restricted downside risk. Part 7 of the Red Hot Investments package uncovers the property investment hotspots from around the world: The real estate investment paradise in which capital growth is expected to be 20 a year over the next few years (hint: this European country has a bounty of beach and ski resorts & is experiencing a rapid surge in tourism). Several real estate hotspots are discussed including Greece, Cyprus, Italy, Mexico & more. Your Best Life is Now, Dee Ferdinand, Alex Albert & Rene Fong P.S. We are letting you and others who are interesting in investment projects to get this information and the lowest price possible. This Red Hot Investment Project Report in itself is valued at U\$37. We want you to grab this insider information at the most affordable cost only for U\$6.77 that would be the same cost like the pack of value meal at your local fast food restaurant.
