----- SONGS ABOUT AUTISM AND FAMILIES The album What Remains chronicles the lives of parents raising children with autism. It was written to raise awareness of the chronic emotional and financial stress that accompanies an autism diagnosis, and to rally support for increased health insurance coverage for autism, enforceable special education laws, and national standards of care and certification for autism professionals. A WAY TO EDUCATE FRIENDS, FAMILY, AND PROFESSIONALS Through my own experience, I appreciate how hard it can be for your friends and family to understand the amount of stress you deal with every day. This can also be true for the professionals who work with your child. That's why I wrote these songs - to provide a sense of validation for parents and to give them a way to educate their inner circle about the overwhelming emotional, financial, and social stress that accompanies an autism diagnosis. "Dear Jamie: Well, I finally found the time and space to be able to listen to my copy of What Remains...I slipped the CD into my player not knowing what to expect. Out poured a river of the most beautiful heartfelt music...And I cried as your songs brought forth my own deep love for my beautiful Spectrum child and my longing for an easier life for her. I'll be buying several more copies for friends and relatives." -- M. Coppola, Owner of Spectrum Yoga of Westwood, MA
