Devachan is Sanskrit for the place of the gods, paradise; commonly referred to as heaven. In this realm we experience healing, find rest from all the concerns and worries of our earthly life, and feel the vitality of our natural essence. We are revived, enlivened and renewed. Rudolph Steiner spoke of Devachan as being a place of dreamless sleep that is traveled to in our rest each night. He said Devachan is a realm where light and sound become one. "The sounds that are brought to us from this homeland stir our feelings and reconnect us through pure joy and sublime spirituality, something this world cannot provide...from the soul's primordial home, the spiritual world, the sounds of music are borne across to us and speak compassionately and encouragingly to us in surging melodies and harmonies." Let the healing sounds of Devachan carry you into your own "heaven on earth." The place where deep and lasting healing happens
