Classic Melodic Rock 12 MP3 Songs POP: 80's Pop, JAZZ: Smooth Jazz Details: An eclectic collection, THE CLOCK AND THE MOON (the clock symbolizing the passing of time, while the moon represents one's hopes and dreams) has one thread running through it: a talented musician making exciting new music...and doing it right! Asked of Skipper Wise, "If you could push a magic button and make any type of music you wanted what would you be doing?" Skipper's immediate answer was the follow up to his solo vocal release, The Clock and the Moon, which yielded the successful single "Standing Outside in the Rain". Co-produced by Columbia recording artist Peter White, Skipper has assembled an album of songs that are a personal reflection of life. Songs such as the ballad "You Mean Everything" where Skipper sings to a troubled friend, "Where I Began" a look of childhood memories, and "Till I Find You" a song with the romantic sound and musical productions that became the trademark that forged this singer / songwriter's career. One of the rarities included here is the song "Play Your Guitar For Me". Originally released on Peter White's #1 contemporary Jazz album in the United States, it has been remixed in both single and dance versions. As a bonus included on the album is "Standing Outside in the Rain", Skipper's successful single. "I hope everyone just once in their life gets to push a magic button, and follow their destiny, even if it's only for a short moment," says Skipper.
