Artist Information Instrumentation Sounda: Lap Top computer, MIDI Piano, EFX Devices and Software.

Special Guest and sometimes live instruments. I was a former artist from the early to mid-late nineties pre

Sean Paul etc. I was mixing the reggae and the hip hop elements at that time. I came pretty close to

some really great business deals, but this is a business. Met a few people that became famous along the

way. I predicted/opinionated a few potential hits that became really big hits on the radio, but I was told at

that time, this is not possible, that is not possible. I was producing without hands on control, therefore my

ideas were not applied like they should. Gave the music a long break. Graduated from College and did

the 9-5 thing, but I came out from hibernation after assisting my spiritual half in a theatrical productions

she was in. After my spirit was released from hibernation (A man's spirit never dies...The spirit of sound

and music never dies, it hibernates until the right time)I emerged as a Instrumental and Sound EFX

Artist,incorporating the Theatrical experiences with Sound and Music. We did a production in NYC,

Experimental Theatre with a alternative Rock musician and got a good response. I am now on a quest to

continually merge The audio/visual elements. I was in the process of producing a full length Cd,(Out From

Hibernation: The Guerilla Tactics)but decided to do a EP first: INI-Ching The God Factor. INI is a

Rastafarian term for Me Myself and I, spiritually connected to Yourself and The Creator. I-Ching is a

Chinese term for the same ideaology, therefore I combine the words.The God Factor,is the factor of God,

not Religion. Religion creates separtism and superiority complexes. How do people factor God, The

Creator, The Most High..in existence and every day life. This EP represents 25-35 of what my art is all about. The full length cd should represent the rest. I WIL bE ANYTHING BUT A SLAVE .....Frederick Douglas
