What is Internet Marketing? In a very broad sense, any method that helps you make money out of the Internet by publicizing a product for sale is Internet marketing. If you have a software application, for example, and you sell it on the Internet to make money, then what you are doing is Internet marketing. It is not necessary that the product should be yours. There are many ways in which you can acquire products from others. Getting resell rights to products is one way in which you do this. Becoming an affiliate for some website that is selling a product is another way to do this. Here you are not selling your own product, but you are publicizing it on the Internet all the same. That is why it fits within the definition of Internet marketing. Affiliate marketing is a subset of Internet marketing. Of course, there is a lot more to Internet marketing than meets the eye. It is not as simple as this definition suggests. There are several tactics and strategies that you must use, different ways in which you can go through Internet marketing, and many different levels at which this work. This eBook will help slowly unfurl these various layers and try to make you understand the various aspects that are involved in it. Who is Internet Marketing Meant for? You will be surprised to read this anybody and everybody that has a computer with a reliable Internet

connection can enter into Internet marketing. There are no qualifications or, in most cases, eligibilities needed here. If you think investment could be a problem, then you are mistaken there too. In most Internet marketing ventures, you wont need an investment at all. In most others, if you have about \$100 floating in an online account, it would more than cover your initial expenses. And you dont even need a mentor. Most people who are successful in Internet marketing today have been self-starters and even self- learners. You could do it too. This eBook and other similar resources can help you unleash the potential of Internet marketing. So, read on. Theres a lot more to be learned and understood before you make the start in this grand opportunity. Concepts of Web Traffic Why Internet Marketing Cannot Do without It One of the most important terms that you will repeatedly come across when you are dealing with Internet marketing is =traffic. Basically it means the number of visitors that arrive at a particular site. When a website says that it has traffic of a million per month, then it means that a million people visit that particular website each month. But then there are some things that you should understand as an Internet marketer. We consider some of these aspects here:- 1. Traffic, per se, is not useful to the Internet marketer. It is the unique traffic that counts. You might have traffic of a hundred thousand, but if 90 of them are your regular visitors, then you havent gained anything new. In that case, your meaningful traffic that spells your progress is just the 10 of new people that you have obtained. 2. Again, the people that click on your website link are hardly of any use to you. For making your business a success, you need these people to take some specific action. You need them to download an eBook, subscribe on your website or pay and buy a product, etc. Simple surfers dont do much for your website. Thanks for your interest in this item.
