

Magnetic Resonance Angiography

[DOWNLOAD HERE](#)

From the contents: I. MRA Techniques Chapter 1 Basic Principles of MRI and MR Angiography Frank R. Korosec, PhD Chapter 2 Time-of-Flight Angiography Seong-Eun Kim, PhD, and Dennis L. Parker, PhD Chapter 3 Phase Contrast MRI and Flow Quantification Bernd Jung, PhD, and Michael Markl, PhD Chapter 4 Technical Aspect of Contrast-Enhanced MRA Honglei Zhang, MD, Wei Zhang, MD, and Martin R. Prince, MD, PhD Chapter 5 Time-Resolved Contrast-Enhanced MR Angiography Using Cartesian Methods Stephen J. Riederer, PhD, Clifton R. Haider, PhD, Casey P. Johnson, and Petrice M. Mostardi Chapter 6 Flow-Dependent Noncontrast MR Angiography Mitsue Miyakazi, PhD, Satosha Sugiura, Yoshimori Kassai, MS, Nobuyasu Ichinose, MS, and Hitoshi Kanazawa, MS Chapter 7 Low-Dose Contrast-Enhanced MR Angiography Kambiz Nael, MD, Roya Saleh, MD, Gerhard Laub, PhD, and J. Paul Finn, MD Chapter 8 Vessel Wall Imaging Techniques Rui Li, PhD, Niranjana Balu, PhD, and Chun Yuan PhD Chapter 9 Noncontrast Coronary Artery Imaging Allison G. Hays, MD, Robert G. Weiss, MD, and Matthias Stuber, PhD Chapter 10 Contrast-Enhanced MR Angiography of the Coronary Arteries Qi Yang, MD, PhD, and Debaio Li, PhD Chapter 11 MR Angiography and High Field Strength: 3.0 Tesla and Higher Harald H. Quick, PhD, and Mark E. Ladd, PhD Chapter 12 Susceptibility Weighted Imaging and MR Angiography Samuel Barnes, MS, and E. Mark Haacke, PhD Chapter 13 Non-Cartesian MR Angiography Walter F. Block, PhD, and Oliver Wieben, PhD Chapter 14 Parallel Imaging in Angiography Nicole Seiberlich, PhD, and Mark Griswold, PhD Chapter 15 Targeted Agents for Wall Imaging Emily A. Waters, PhD, and Thomas J. Meade, PhD Chapter 16 Intracranial Arterial and Venous Disease Dariusch Reza Hadizadeh, MD, Horst Urbach, MD, and Winfried A. Willinek, MD II. Clinical Applications Chapter 17 Carotid and Vertebral Circulation: Clinical Applications Max Winterman, MD, MAS, and Sugoto Mukherjee, MD Chapter 18 Thoracic Aorta Emily Ward, MB, BCh, BAO, and James C. Carr, MD Chapter 19 Pulmonary MR Angiography James F.M. Meaney, MD, and Peter Beddy, MD Chapter 20 Abdominal Aorta and Mesenteric Vessels Klaus D. Hagspiel, MD, and Patrick T. Norton, MD Chapter 21 Renal Vascular Diseases Tim Leiner, MD, PhD, Henrik Michaely, MD, PhD Chapter 22 Upper Extremity and Hand Vessels Ruth P. Lim, MBBS, MMed, FRANZCR, and Vivian L. Lee, MD, PhD, MBA Chapter 23

Lower Extremity Peripheral Arterial Disease Jeremy D. Collins, MD, and Timothy Scanlon, MD Chapter 24 Noninvasive Imaging for Coronary Artery Disease Reza Nezafat, PhD, Susie N. Hong, MD, Peng Hu, PhD, Mehdi H. Moghari, PhD, and Warren J. Manning MD Chapter 25 Venous Imaging: Techniques, Protocols and Clinical Applications Amir H. Davarpanah, MD, Philip Hodnett, MD, Jeremy D. Collins, MD, James C. Carr, MD, and Timothy Scanlon, MD Chapter 26 Pediatric MR Angiography: Principles and Applications Bharathi D. Jagadeesan, MD, and David N. Loy, MD, PhD Chapter 27 Contrast Agents for MR Angiography Christoph U. Herborn, MD, MBA Chapter 28 CE-MRA in the Age of Nephrogenic Systemic Fibrosis Aditya Bharatha MD, FRCPC, Sean P. Symons MPH, MD, FRCPC, and Walter Kucharczyk MD, FRCPC Chapter 29 Emerging Interventional MR Applications Clifford R. Weiss, MD, Aravindan Kolandaivelu, MD, Jeff Bulte, PhD, and Aravind Arepally, MD EAN/ISBN : 9781441916860 Publisher(s): Springer, Berlin, Springer US Discussed keywords: MR-Angiographie Format: ePub/PDF Author(s): Carr, James C. - Carroll, Timothy J.
