

Mp3 Erplosis Daet - Sunspot Serenade

[DOWNLOAD HERE](#)

Infectious hard rock with twin guitars similar to classic seventies style. 11 MP3 Songs METAL: 70's Metal, ROCK: Hard Rock Details: Well by now, my fans know that Erplosis Daet is just me and I always welcome new fans. I write all the songs, play all the instruments, do all the vocals, record, mix, and master these CDs myself. I'm really happy with this CD as it's my best effort yet! The songs are among the best I've ever written. The production is better than the first two Erplosis Daet CDs and the vocals and guitar playing are much improved too. I hope you find some enjoyment and/or escape in these tunes. This will most likely be the last Erplosis Daet CD for awhile as the band is breaking up (just kidding). It's really going to be hard to top this project and I will not put out inferior music. For a more detailed analysis of each song you can go to the Erplosis Daet website. Have fun listening, Terry This music was recorded and mixed in my home studio on professional recording equipment. Mastering was by P.O.P. which is my computer mastering software (all state-of-the-art). I designed the CD art and layout. The music is burned onto CDRs with no shrinkwrap. Since I sell very few of these projects, costs are kept to a minimum which helps to maintain a lower retail price. Thank you for supporting independent artists. Terry Kempler
