

Mp3 Finnlux Tuna - Futurtablism

[DOWNLOAD HERE](#)

Down tempo electronic and electro breaks. Production style from old tape compression emulation to futuristic nuskool breaks with high tech sounds and fx. 7 MP3 Songs ELECTRONIC: Breakbeat/Breaks, ELECTRONIC: Experimental Details: Biography Electronic music project Finnlux Tuna was established in the beginning of 2004. The project got an inspiration when someone asked me to produce music for 3d-animation. The first track "Bathroom Fantasy" was actually composed for a 3d-animation. However the animation was never finished. The style and distinctive sound of Finnlux Tuna started to develop from sampled guitar loops, hip hop and breakbeat drum sounds spiced with electro sounds and robot voices. Finnlux Tuna project is concentrating into electro, electronic breaks and downtempo style of electronic music. The goal is to produce listenable and enjoyable electronic music. Artist website: digitalbeatmusic.com/jamroom/finnlux_tuna Music for a DVD movie release - High Octane Detonate Finnlux Tuna tracks "Bathroom", "Electronichan" and "Futurtablism" can be heard on High Octane Detonate DVD soundtrack. Movie release date is 22nd september 2005. This action packed tuning car movie release is distributed by Sony Home Entertainment in 8 different countries across Europe. Movie is distributed also in Australia and New Zealand. The label Digital Beat Music and artist Finnlux Tuna would like to give a huge salute to the High Octane producing team in New Zealand! Info about the film - check out the producer website. highoctane.co.nz
