Crafted, classic but fresh pop with a country sensibility 14 MP3 Songs POP: British Pop, COUNTRY: Country Pop Details: The Davids write songs...good songs, songs you can identify with, songs about life, love, what goes around comes around, disappointments and what's great and what makes you feel really good and really alive - all with great melodies. There are a lot of influences - country obviously - not the schmaltzy kind but the honest, earthy, soulful type of country that can really touch the heart. But also the best of 60's and 90's British bands that formed the emotional backdrop for different generations around the world. Musical craftsmanship and production qualities of David Osborne (US based) and the flexible voice and insightful words of David Gwyn Jones (UK based) blend to form a wonderful song based album that not only makes your toes tap but tap into the emotional to's and fro's of what it's like to be alive, in love or alone in the year 2005 From the opener (What A Fool Sees) which really does rock, through the yearning paeans to heartbreak of Times Up and Once In Your Life or Everytime I Get Close, to the classic quality pop of Break In The Clouds or Her Face Fits this is an album to play again and again. Play to your friends, play to your lovers - both present and past - and take it home and treasure. However things are going for you The Davids help uplift, empathize, and ultimately make you feel much better about it all. Nottingham Beauties. Hear this album - Buy this album
