

Multiphase Reacting Flows

[DOWNLOAD HERE](#)

Contents: - R.O. Fox: Introduction and fundamentals of modeling approaches for polydisperse multiphase flows. - D.L. Marchisio: Quadrature method of moments for polydisperse flows. - M. Massot: Eulerian multi-fluid models for polydisperse evaporating sprays. - B.H. Hjertager: Multi-fluid CFD analysis of chemical reactors - J.J. Derksen: The lattice-Boltzmann method for multiphase fluid flow simulations and Euler-Lagrange large-eddy simulations. - J. Reveillon: Direct numerical simulation of sprays: turbulent dispersion, evaporation and combustion EAN/ISBN : 9783211724644 Publisher(s): Springer, Berlin, Springer, Wien Format: ePub/PDF Author(s): Marchisio, Daniele L. - Fox, Rodney O.
