"the show was outstanding" -unperson "i've heard a lot of the material ... it floats through several different styles, mixing quite a few - industrial, ebm, pop with some sounds that are bordering on techno - all done tastefully ... something that sounds clean and uncluttered." -eric. "their music is different than the typical synthpop sound, especially since i see a lot of 'pop' put in to industrial music, and that makes it cool. if you are looking for a dark synthpop sound with an industrial twist....check out alaska highway !!" -synth-master
