Related styles: ELECTRONIC: Synthpop, ELECTRONIC: Electronica People who are interested in Koto should consider this download. Details: In the end of the eighties AnalogixX started with the first software samplers called tracker. There was a huge tracker-scene in the late eighties and the nineties. These programs were DOS based. A few samples were used to create i.e. a four-track piece of great music. The years went by and professional samplers and synthesizers came along. AnalogixX is passionate for electronic music, especially Italo-Disco and instrumental tracks. So the music style is of course electronic and instrumental.
