The bee is an amazing animal. Both kind and loyal, it has lived with humans since before recorded history! Did you know that Egyptians used bee's honey on their open sores and ghastly wounds? It's true. Honey is both delicious and amazingly sterile; no bacteria can grow in honey and it keeps forever. You can eat honey that is thousands of years old! If you can find any, that is. B is for Blake is my first album. I wrote all these songs at the age of 17 during my final year of High School. I suppose you could say that these songs are an emotional reflection of my life so far, my fears about myself and my own self worth, and the difficulty of embracing the love of music and guitars. I am 18 now and loving every musical moment of my life. As one bee said to the other, "My whole life is ahead of me, and I can bee anything I want to bee!" So... Buzz buzz!
