Sony Creative Software presents the Paul Black: Blues Guitar collection - a blues guitar masterpiece. Enter the gold mine of authentic, traditional blues: deep delta stylings and scorching urban riffs, rich with tone and character. We locked out world-class Smart Studios to faithfully capture the essence of Paul's celebrated slide and fingerstyle work, using the finest vintage instruments and amplifiers. Then we distilled his riffs and licks down to a fine mash. The Blues Guitar collection represents the first of many Sony Sound Series libraries uniting artists, engineers, and editors with the ACID software user in mind. 660 (611 MB) original, royalty-free WAV files.
