The Popularity of Audiobooks is Redefining the Notion of Reading! According to the Audio Publishers Association (APA), audio books are

becoming popular because of their convenience and their high-perceived value. One of the chief benefits of audio books is that you can listen to them while doing other things such as commuting to work, waiting to pick up your children from an activity, working out at the gym, exercising at home, doing household chores, jogging, walking, driving, mowing the lawn or doing other outside work, at night while your partner sleeps (you won't keep them awake by having a light on), and much, much more! Due in part to this convenience factor, currently one in five U.S. households purchases at least one audiobook a year and that number is expected to rise dramatically in the future changing the landscape of reading in much the same way that digital music has reshaped the music industry. In fact, it wasn't very long ago that the thought of carrying around 10,000 songs, or a complete book, in your pocket seemed pretty silly. But now that more than 42 million iPods and 27 million MP3 players have been sold, the concept of taking music, or an audiobook, with you as you go out is as normal as walking out the front door with a credit card in your wallet!
