# Avalanche For Shopify

DOWNLOAD HERE

Avalanche for Shopify is a responsive shopping cart theme written in HTML5 / CSS3 , which provides a convenient way for your customers to buy your products at home or on the go and which seamlessly adapts to your customers screen sizes no matter if they use a desktop pc, a tablet or a smartphone to view your site. Even though the default setup uses an outdoor sports theme, you can literally use it for any other product category as well due to its clean and minimal overall appearance as well as plenty of theme settings you can adjust easily from within your Shopify backend. Highlights M-Commerce ready Nearly 120 theme settings to make it truly yours Big and bold slide down menu including featured products and quick access to various parts of your catalog Beautiful, handcrafted design Clean, quality source code written in valid HTML5 and CSS3 Responsive, touch friendly image and product slideshow supporting gestures Working Twitter feed Newsletter subscription with MailChimp / CampaignMonitor support Layered PSD file Documentation & Support Even though a detailed documentation has been included for your convenience, you can of course always send me an email to hello@indiqo.eu or leave a comment whenever you should have some kind of question, need my help or maybe got a suggestion how to improve this theme even further. Any kind of feedback is appreciated and I usually try to answer to your requests within 24 hours, but most of the time even faster, so dont hesitate to contact me at any time!
