

# Digital Processing And Reconstruction Of Complex Ac Signals

[DOWNLOAD HERE](#)

1;Table of contents ;5 2;PREFACE;7 3;1.INTRODUCTION;8 3.1;1.1 Basic Principles of the Suggested Measuring Method;9 3.2;1.2 Mathematical Proof of Justification of the Suggested Measuring Method ;14 3.3;1.3 Mathematical Proof of Correctness in the Active Power Processing;17 3.3.1;1.3.1. Analysis of the Numerical Procedures Suggested in the Processing of Periodic Signals ;21 3.4;1.4 Adaptability of the Suggested Algorithm Used for Measuring Electric Values in Electric Utilities ;22 3.5;1.5 Analysis of Possible Sources of Errors in Digital Processing With a Suggested Measurement Concept ;24 3.5.1;1.5.1 Simulation Results;29 3.5.2;1.5.2 Analysis of the Error Caused by Imprecision in Determining Sampling Interval;30 3.6;1.6 Simulation of the Suggested Measuring Method in the Matlab Program Package;36 3.6.1;1.6.1 The Software Testing of the Suggested Measuring Concept of Electrical Values Based on Measurement Results in Real Electric Utilities ;41 3.7;1.7 Practical Realization of the Suggested Digital Measuring System;44 3.8;1.8 Results of Practical Measurements with Realized Digital Wattmeter;52 3.9;References;58 4;2.DIGITAL PROCESSING OF SYNCHRONOUSLY SAMPLED AC SIGNALS IN PRESENCE OF INTERHARMONICS AND SUBHARMONICS;61 4.1;2.1 Synchronous Sampling in the Presence of Subharmonics and Interharmonics;62 4.1.1;2.1.1 Derived Conditions for Precisely Processing;70 4.1.2;2.1.2 Asynchronous Sampling;72 4.2;2.2 Simulation Results;73 4.3;2.3 Calculation of the Truncation Errors in Case of Asynchronous Sampling of Complex AC Signals ;76 4.3.1;2.3.1 Analysis of Worst-Case Errors;76 4.3.1.1;2.3.1.1 Average Method;78 4.3.1.2;2.3.1.2 Trapezoidal Method;79 4.3.1.3;2.3.1.3 Stenbakken's Compensation ;80 4.3.1.4;2.3.1.4 Zu-Liang Compensation;80 4.3.1.5;2.3.1.5 Average Method- approximate expression ;81 4.3.1.6;2.3.1.6 Trapezoidal Method- approximate expression;81 4.3.1.7;2.3.1.7 Stenbakken's Compensation- approximate expression ;81 4.3.1.8;2.3.1.8 Zu-Liang Compensation- approximate expression;82 4.3.2;2.3.2 Simulation Results;82 4.4;References;86 4.5;Appendix A;87 5;3. RECONSTRUCTION OF NONUNIFORMLY SAMPLED AC SIGNALS;89 5.1;3. 2. Proposed Method of Processing;91 5.1.1;3.2.1 The Determinants of the Van der Monde Matrix;92 5.1.2;3.2.2 Reconstruction of Band Limited Signals in

Form of Fourier Series;93 5.2;3.3. Simulation Result and Error Analysis;98 5.3;3.4. Possible Hardware Realization of the Proposed Method of Processing;102 5.4;References;105 6;4. A NEW METHOD FOR PROCESSING OF BASIC ELECTRICAL VALVES BASED ON DEFINITION FORMULA IN TIME DOMAIN ;115 6.1;4. 1. Suggested Method of Processing;115 6.1.1;4.1.1 Estimation of Measuring Uncertainty;118 6.2;4.2. Simulation of the Suggested Measuring Method;118 6.3;4.3. Practical realization of proposed algorithm;120 6.4;4.4. Experimental Results;122 6.5;References;124 EAN/ISBN : 9783642038433 Publisher(s): Springer, Berlin Discussed keywords: Digitale Bildbearbeitung, Signalverarbeitung Format: ePub/PDF Author(s): Petrovic, Predrag B. - Stevanovic, Milorad R.
