Details: MASTER SLASH SLAVE doesn't care if you think playing along with pre-programmed keyboards is cheating - it's actually really quite hard. For the past 3 years Master Slash Slave's creator and songwriter Matt Jones has literally been navigating from scandal to scandal, trying to put out the band's debut record which is not surprisingly titled "SCANDAL." Influences include classic early 80s synth, MIDI controlled compositions, 60s garage-styled guitars, live drums and highly affected vocals which are mainly about pretending to be rich.
