Details: Ive been involved in music for longer than I care to remember. Ive played and studied so many different styles of music that my songwriting is inevitably affected by all of these influences. My current album is no exception, what began as a set of acoustic guitar and vocals only pieces quickly turned into something much more varied. In addition to a set of well written songs, youll find deft guitar and virtuoso fretless bass work, contrapuntal ebow passages and great vocal harmony arrangements.
