

Mp3 Heaven Leigh - Faith In You

[DOWNLOAD HERE](#)

Original blend of smooth pop and provocative vocals mixing spiritual, family and romantic themes. 9 MP3 Songs SPIRITUAL: Contemporary Christian, EASY LISTENING: Love Songs Details: I grew up singing in church and being told I put too much emotion into my songs. I soon realized that there really isnt much point in music without emotion. The first three songs on my Faith in You CD represent my musings about what I think or hope our source of love and light is. These are love songs to my creator. The fourth track, entitled Unbroken Spirit was written as a tribute to the Native American people and originally meant to enhance the promotion of a book in which my father did several amazing portraits of Native American film stars. I included the song on my CD because its a reminder of the importance of not letting anyone break your spirit no matter what. The fifth track Mothers Song is something I wrote for my mother to get her to speak to me again. Ha! No really. It was part of my journey back into my family after a necessary breaking away to establish my own identity. We all do this, in one way or another, right? -- some more dramatic, some less. Im very dramatic. I needed, through Mothers Song to go back and acknowledge how much my mothers love has shaped me as a person and to help bring that love into my own intention to nurture my children and help them be the best that they can be. Standing By Your Side, the sixth track was inspired by the passing of a dear friend. I hope she likes it. She had such a fun, energetic personality and a laugh that you could hear across a room and be drawn to instantly. When I recorded this song I was thinking about all the people I miss having here on earth with me. Sometimes I can feel their energy and it makes it all the more real that I will see them again. The seventh song on the album is entitled Empty. If youve ever loved and lost you know how this feels. It hurrreeeeeeeeeeeeeeeeeeeeeeeeee. Ive been at the bottom of that pit and its therapeutic to sing a sad song sometimes, so if it makes you feel better sing along. Hold Me is about a healing love that hopefully everyone finds at some point in their lives. I

personally wrote it to get my husband to speak to me again. No, just kidding. I didnt have the money for a real birthday present that year so... hey if youre a writer you can empathize! If these songs are even half as much fun for you to hear as they were for me to record, youre in for a great time. Thanks for listening!
