While recording a music segment for an audition in a reality T.V. show for W.B. with Ken, local actress/model Julin was caught surprised when Ken offered to produce a single. Both Julin and Ken agreed to launch a music single and add to Julin's portfolio. Nevertheless, Julin already had made her mark with films, TV shows, music videos, and commercials, as well as adding fashion shows and modeling to her commercial success. As the single and artist was in development, musical worlds had intertwined and hard work pushed more than a single. Soon the single evolved into an album. Driven by grooves and emotional melodies, Julin's music defines its own blend of pop. Heavily influenced by R&B and Euro-rock genres, Julin's music captivates the listener into a journey that expresses her stories and views, going beyond and captivating different emotions that are not usually expressed in today's pop mainstream music. A writer and singer since the age of eight, Julin feels as though she has the opportunity to express the different emotions and life experiences. Julin the entity is a music reality that incorporates an emotion that all people can relate. These are two artists whose synergies will soon launch their own musical destiny. "Being honest with yourself and expressing that is challenging. But the journey takes you to a place beyond what words can describe. Hopefully, the music will help in taking you there too."-Julin
