

## Mp3 Shame Train - Gone

[DOWNLOAD HERE](#)

Americana pop and folky country that rocks, swings, twangs, weeps, and preaches its way into your heart without ever beating you over the head. 13 MP3 Songs POP: Folky Pop, FOLK: Power-folk Details: Compared to everyone from Tim Buckley to Deputy Dawg, Knutson racks up another choice record with the Shame Train. Gone's thirteen songs come in as varied in style as the last batch. The alt country tag still sticks but there is straight ahead pop music on this album of the variety that kept the last record from being considered a viable product at miles of music. The review in July's No Depression [though it did the album no real lip service] did comment on the variety of styles and the fact that without being cliché it hit on every note it went for. The band and songwriter are unwilling to limit themselves stylistically to a packageable, one-tag sound, and, although jazz seems to have been slapped into the description in a lot of published reviews this writer doesn't see it. This album, Gone, is the sound of people playing music together in a room; good musicians who know how to confidently play something they may have never heard before and pull it off, and hit the mark doing so. The success of the last record "Shame Train and the Devil's Square Quilt", in a radio and press on a national level kind of a way has not yet been fully realized (though over a hundred radio shows all over America and in Europe play the record) this doesn't stop the Shame Train from bringing another BETTER record into the world. I suppose that's the thing to do, always top yourself. And they have. Gone rocks, swings, twangs, weeps, and preaches its way into your heart without ever beating you over the head. It's a comfy listen, front to back, and deserving of greater attention. -Jameson Fink It is also CD of the month this month at a radio station called KUNI. see KUNIRADIO.org See also an album called M.U.S.E. (musicians united to save the english [a local old theatre]) on trailer records @ trailer-records.com The web site (WWW.SHAME-TRAIN.COM) should be up and running within the month, and there are things you can get there that you can't get here. see
