B'Mums Soothing Womb Sounds with gentle background music to reassure and comfort new babies and young children is the perfect bedtime soundtrack. 2 MP3 Songs in this album (61:19) ! Related styles: EASY LISTENING: Mood Music, NEW AGE: Relaxation Details: After the trauma of birth and the cold starkness of life outside the womb it should come as no surprise to learn that many newborn babies sometimes need a little help getting off to sleep! This is where B'Mums Soothing Womb Sounds can help. Your baby will be reminded of time in the safety, warmth and darkness of the womb listening to the sounds of a mother's heartbeat, the blood rushing through her veins and her digestive gurgles, all the while hearing the soft relaxing background music recorded at a speed proven to aid deep relaxation. This recording is also extremely successful when used with small children and even mothers who need some time out to relax.
