

# Auto Blog Feeder - Ultimate Blog Automator+6500 Plr Articles

[DOWNLOAD HERE](#)

Its a Wordpress plugin that will post articles to your blog using .txt files that it finds in a folder you point it to. Just tell it about a folder full of articles in .txt format and it will schedule them as posts on your blog for months and years to come, depending on the amount of content. The entire process takes just three clicks to do all the work, and then you can sit back and enjoy the fruits. This is awesome because Google will think your blog keeps getting updated with fresh content, and will treat it as an authority site. Used in conjunction with the 6500+ PLR articles pack mentioned above, this is very powerful, especially if you create blogs in multiple niches. But you can use it with any set of articles, even ones that you have written yourself.
