

Iutam Symposium On Computational Physics And New Perspectives In Turbulence

[DOWNLOAD HERE](#)

From the contents: Part I Computational Physics and Theory for Canonical Turbulence: - Some Contributions and Challenges of Computational Turbulence Research, by Javier Jimenez; Global Scaling Properties of Heat and Momentum Transport in Fluid Flow, by Bruno Eckhardt, Siegfried Grossmann, Detlef Lohse; Linear and Angular Momentum Invariants in Homogeneous Turbulence, by Peter Alan Davidson, Takaki Ishida, Yukio Kaneda; Energy Dissipation and Pressure in 4d Turbulence, by Toshiyuki Gotoh, Tohru Nakano, Yoshitaka Shiga, Yusaku Watanabe; On Intermittency in Shell Models and in Turbulent Flows, by Itamar Procaccia, Roberto Benzi, Luca Biferale; Enstrophy Generation and Regularity of Solutions to the 3D Navier-Stokes Equations, by Charles R. Doering, Lu Lu; Attempts at Computer-Aided Understanding of Turbulence, by Yukio Kaneda, Takashi Ishihara, Koji Morishita, Yoshinori Mizuno; Effect of Large-Scale Structures upon Near-Wall Turbulence, by Kaoru Iwamoto, Takahiro Tsukahara, Hideki Nakano, Hiroshi Kawamura; Multifractal Analysis by Using High Resolution Direct Numerical Simulation of Turbulence, by Takashi Ishihara, Hirotaka Higuchi; Fine Scale Eddy Cluster and Energy Cascade in Homogeneous Isotropic Turbulence, by Mamoru Tanahashi, Kuniharu Fujibayashi, Toshio Miyauchi; Acceleration Statistics of Inertial Particles from High Resolution DNS Turbulence, by Federico Toschi, Jeremie Bec, Luca Biferale, Guido Boffetta, Antonio Celani, Massimo Cencini, Alessandra S. Lanotte, Stefano Musacchio; Heavy Particle Clustering in Turbulent Flows, by Jeremie Bec, Luca Biferale, Massimo Cencini, Alessandra Lanotte, Stefano Musacchio, Federico Toschi; Reynolds Number Effects on the Turbulent Mixing of Passive Scalars, by Jrg Schumacher; Statistical Theory of Turbulence Based on Cross-Independence Closure Hypothesis, by Tomomasa Tatsumi, Takahiro Yoshimura; Multi-Scale Analysis of Turbulence, by Malte Siefert, Stephan Luck, Andreas P. Nawroth, Joachim Feinke; Helicity within the Kolmogorov Phenomenology of Turbulence, by Susan Kurien; Anomalous Scaling Laws of Passive Scalar Intermittency in 3-Dimensional Turbulence, by Takeshi Watanabe; Multifractal PDF Analysis of Energy Dissipation Rates in Turbulence, by Toshihiko Arimitsu, Naoko Arimitsu, Kyo Yoshida, Hideaki Mouri; Scale Interactions and Non-Local Flux in

Hydrodynamic Turbulence, by Pablo D. Mininni, Alexandros Alexakis, Annick Pouquet; Control over Multiscale Mixing in Broadband-Forced Turbulence, by Arkadiusz K. Kuczaj, Bernard J. Geurts; Coherent Structures in Marginally Turbulent Square Duct Flow, by Markus Uhlmann, Aifredo Pinelli, Atsushi Sekimoto, Genta Kawahara; Extraction of Multi-Scale Vortical Structures from a Homogeneous Isotropic Turbulence, by Waleed Abdel Kareem, Seiichiro Izawa, Ao-Kui Xiong, Yu Fukunishi; Orthonormal Divergence-Free Wavelet Analysis of Nonlinear Energy Transfer in Rolling-Up Vortices, by Keisuke Araki, Hideaki Miura; ... EAN/ISBN : 9781402064722 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Kaneda, Yukio
