Details: Glasnost was formed out of two electronic bands that realized there was something to be said for live rock show performances. By taking the elements of pop bands such a New Order, Cut Copy etc and combining it with the energy and sound of a live rock show a unique sound and experience was formed. Influences include Cut Copy, New Order, MSTRKRFT and Justice, Midnight Juggernauts, Gang of Four, etc.. Glasnost is unique in that the sound is never that of typical guitar rock but rather strives for layered vocals, driving dance beats using a live acoustic set drummer, and multi-layered instrumentation. All musicians perform on multiple instruments throughout the set as deemed suitable for the composition.
